- 3) Throughout the 1950's, there were increases in the numbers of dead birds found in agricultural areas after pesticide sprayings. Pesticide manufacturers claimed that the publicity given to bird deaths stimulated volunteers to look for dead birds, and that the increase in numbers reported was attributable to the increase in the number of people looking. Which of the following statements, if true, would help to refute the claim of the pesticide manufacturers?
- A) The publicity given to bird deaths was largely regional and never reached national proportions.
 - B) Pesticide sprayings were timed to coincide with various phases of the life cycles of the insects they destroyed.
 - C) No provision was made to ensure that a dead bird would not be reported by more than one observer.
 - D) Initial increases in bird deaths had been noticed by agricultural workers long before any publicity had been given to the matter.

- 5) Obenbe Manufacturing Company initiated a voluntary Quality Circles program for machine operators. Independent surveys of employee attitudes indicated that the machine operators participating in the program were less satisfied with their work situations after two years of the program's existence than they were at the program's start. Obviously, any worker who participate in a Quality Circles program will, as a result, become less satisfied with their jobs. Each of the following, if true, would weaken the conclusion drawn above EXCEPT;
- A) The second survey occurred during a period of recession when rumors of cutbacks and layoffs at Obenbe Manufacturing were plentiful.
 - B) While participating in Quality Circles at Obenbe Manufacturing, machine operators exhibited two of the primary indicators of improved job satisfaction: increased productivity and decreased absenteeism.
 - C) Several workers at Obenbe Manufacturing who had participated in Quality Circles while employed at other companies reported that, while participating in Quality Circles in their previous companies, their work satisfaction had increased.
 - D) The machine operators who participated in quality circles reported that, when the program started, they felt that participation might improve their work situations.
